The Sustainability that we aim to achieve

Our business can only exist through connections with our stakeholders and society as a whole. As the social environment continues to undergo rapid changes, we must face numerous challenges such as global warming, low birth rates and aging population, and depopulation of rural areas. With consideration for the relationship between these social issues and our businesses, we have determined three major themes for the initiatives that we are carrying out for the achievement of sustainable management.

Bring the joy of fashion to the future.

Fashion has the power to make our daily life positive.
Let's start with what we can do for the environment, people and the community while enjoying our lives because the best way to keep doing it is to have fun doing it.

The Adastria Group Sustainability Policy

	Engage in manufacturing that leads to the future	Convert to sustainable raw materials and processing for over 50% of all products by 2030.
	Create a world without fashion loss	Eliminate incineration disposal of clothing inventory.

Earn the Health and Productivity Management Organization (White 500) certification.
 <p>COMMUNITY Growing With Local Communities</p>	Foster sustainable development in production areas	Promote partnership certifications for production factories by 2023.

Specific Examples of Our Actions
